Key Points

Today - Monday

- **Elevated/Critical Fire Weather conditions across NM/W TX into the TX/OK Panhandles through Monday.**
- **Strong/severe thunderstorms possible today - NE OK into NW TX.**
- **Strong/severe thunderstorms possible Monday SW TX into NE OK.**
- **Heavy rainfall/flash flooding possible from NE OK into N TX - Monday.**

Tuesday - Thursday

- **Strong/severe thunderstorms across TX into SW AR/NW LA.**
- **Heavy rainfall/flash flooding possible across E OK/TX into AR/LA.**

River Flood Status

- **The Atchafalaya River continues a flat crest at Morgan City, LA and remains in moderate flood stage.**
- **Due to the operation of the Bonnet Carre spillway, the gauge at Reserve, LA will continue to show minor flooding levels until the spillway is closed. This location should start to recede in the next week.**

FEMA Region 6 Threat Matrix

Mar 25, 2018 - Mar 29, 2018

DAY / THREAT	SUN	MON	TUE	WED	THU
Strong/Severe Storms	TX/ OK	SW TX/OK	TX SW AR/NW LA	E TX/LA	
Heavy Rain / Flash Flooding		NE OK/NW TX	NE TX/SE OK AR	E TX/SE AR LA	LA
Fire Weather	NM/W TX TX/OK Panhandles	NM/W TX			
Winter					
River Flooding	LA				
	LA/E AR				

- No Weather Threats Expected
- Very Common – Happens Often
- Common – Happens Frequently
- Uncommon – A Few Times a Year
- Rare – Once Every 1-5 Years
- Very Rare – Once Every 5-10 Years

For more details on the colors in the threat matrix refer to the last slide in this briefing.

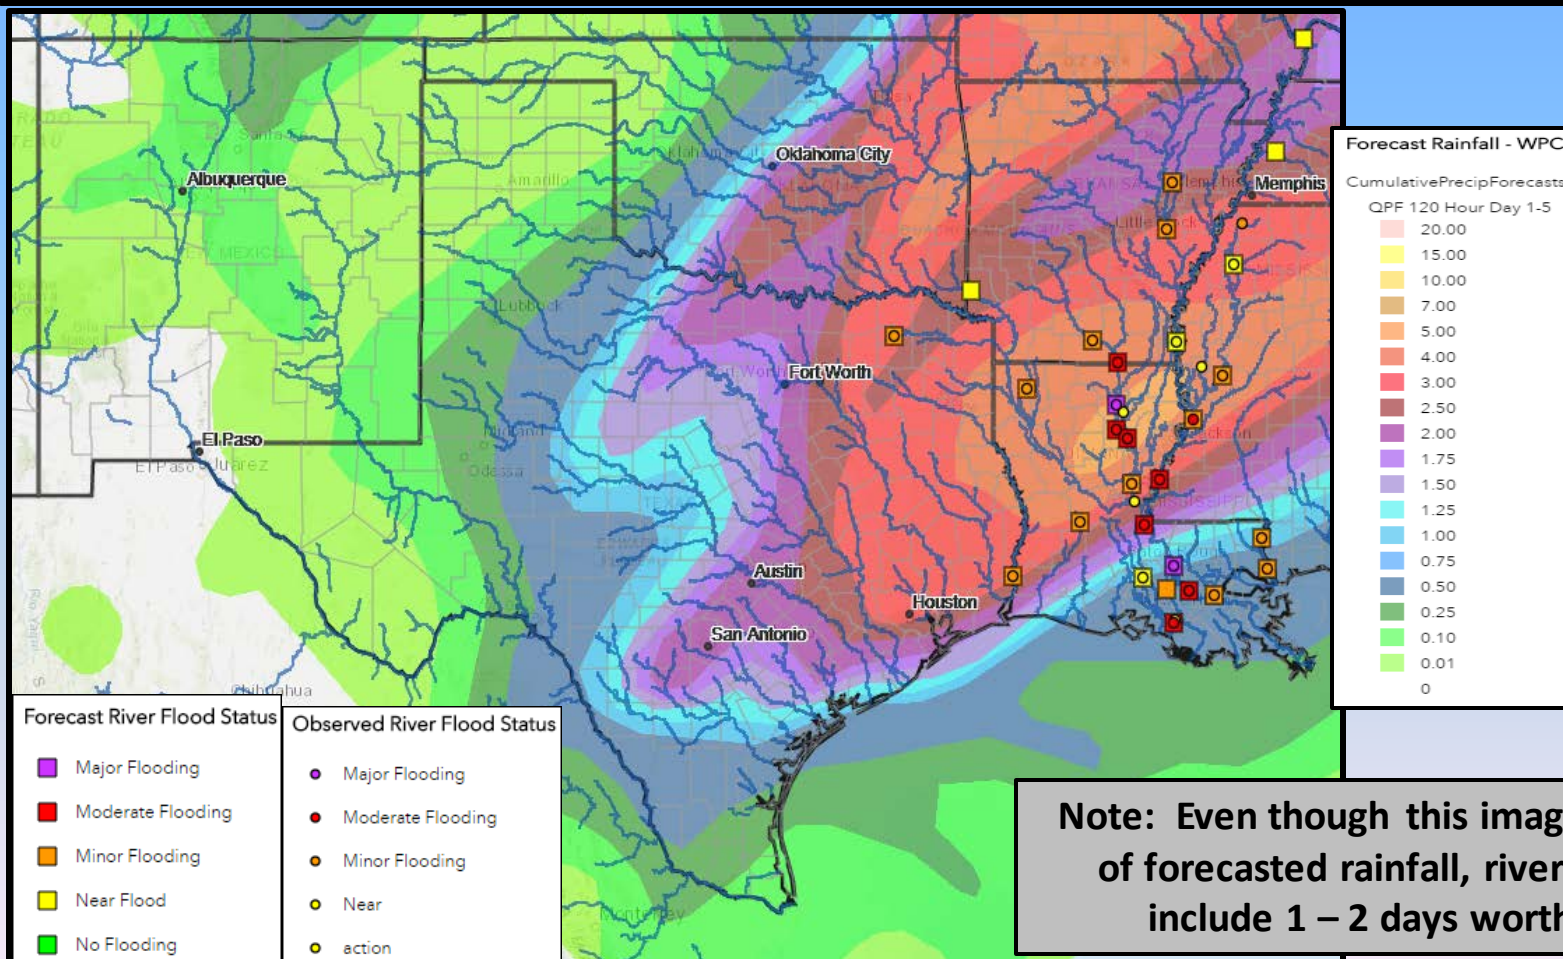

5-Day Precipitation Forecast & River Flood Status

Moderate to major flooding continues on the Ouachita and Mississippi Rivers in LA:

- The Atchafalaya River remains in moderate flood stat at Morgan City, LA.
- Due to the operations of the Bonnet Carre spillway the stage at Reserve, LA will continue to fluctuate around minor flood stage until the spillways is closed.

Minor flooding continues in LA and E AR.

Note: Even though this image displays 5 days of forecasted rainfall, river forecasts only include 1 – 2 days worth of rainfall.

The criteria for the color codes in our briefings is below, please provide any feedback to sr-srh.roc@noaa.gov.

Weather "Threat" Matrix			
Color	Definition	Criteria	Example(s)
Green	Very Common Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active	<ul style="list-style-type: none"> Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees Something that happens almost every day in a particular season such as <u>seabreeze</u> storms in coastal TX
Yellow	Somewhat Common – Happens Frequently Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook	<ul style="list-style-type: none"> 2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1" hail
Orange	Uncommon – A Few Times a Year Safety: Often Threatening to Life and Property, Some Damage Unavoidable Impact Potential: Typically Results in Minor Disruption to Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions	<ul style="list-style-type: none"> A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail Some large fires reported, burn bans advertised, critical conditions expected
Red	Rare – Once every 1-5 Years Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought	<ul style="list-style-type: none"> A Category 1 hurricane will be moving towards the NW Gulf in the next few days Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail Large fires ongoing throughout the area with critical fire weather conditions expected to continue
Purple	Very Rare – Once Every 5-10 Years Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed Impact Potential: Typically Results in Long-Lived Widespread Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long term (months) of severe to extreme drought	<ul style="list-style-type: none"> A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow Widespread severe storms expected, tornado outbreak probable with long-lived, very widespread and particularly intense storms
